LECICO SOUTH AFRICA

COMPANY PROFILE

We make bathrooms beautiful

Our Directors

Karl Geyer
Managing Director

Jacky Rossouw
Sales Director

Introduction

At Lecico, we believe every space, regardless of size or style, deserves access to premium bathroom and sanitary products without compromising on affordability.

Our commitment goes beyond exceptional products – we pride ourselves on **outstanding customer service** and **ensuring stock availability whenever you need it**.

Whether you're a homeowner upgrading your space, a contractor sourcing reliable supplies, a merchant stocking quality products, or an architect working on a major project, we are here to make the process as **convenient** as possible.

Our Mission

We aim to turn our customers and staff into brand ambassadors and loyal advocates who do our marketing for us.

Our Vision

We aim to serve our customers and treat our people and partners with **loyalty, professionalism, care** and **excellence**.

We are known and trusted locally for our superlative product quality, service, competitive pricing, and availability.

Why you'll love us

The majority of our bathroom ware is **manufactured in Egypt**.
We also import from Asia and source local products from across Southern Africa.

- ✓ Industry-leading warehousing & logistics
- ✓ Comprehensive spec support
- ✓ Customer-centric approach
- ✓ Premium product quality
- ✓ Always available stock
- ✓ Wide product variety
- ✓ Incredible warranties
- ✓ Strict quality control

NEVER USE CEMENT WHEN SECURING A TOILET PAN TO THE FLOOR

- Cement is a rigid material that does not provide any flexibility or shock absorption. Toilets can experience minor movements due to usage, which could potentially lead to cracks in the toilet or the floor if it is fixed in place with cement.
- Using cement around the base of the toilet will make repairs extremely difficult. The cement will make it difficult to remove or replace the toilet without completely damaging the toilet or the floor.
- If a toilet is cemented to the floor, detecting and fixing leaks becomes very complicated.
- There are hygiene concerns with cement because cement is porous and it can absorb water leading to unpleasant odours.

Please Note:

This product is manufactured with tempered glass and could shatter if knocked or bumped.

COMPONENTS:

- 1 x glass panel with wall profile (a)
- 1 x wall fixation channel (b)
- 3 x plated caps and rings
- 3 x 4.2 * 9.5 stainless steel screws to lock panel in position to wall profile
- 3 x 4.2 * 38 stainless steel screws to fit wall profile to wall
- 1 x wall fitting: lug and cover (c)
- 1 x glass fitting (d)
- 1 x 1m stabilising bar (e)
- 1 x floor block (f)

INSTRUCTIONS:

1. Mark the allocated position for the glass panel on the wall.
2. Fit the wall fixation channel level and square to the floor and the wall.
3. Fit the glass panel in the wall fixation channel.
4. Mark the position of the floor block.
Remove the glass to drill for the floor block.
5. Install the wall fittings for the stabilising bar.
6. Line up the glass fitting for the stabilising bar at 90 degrees to the glass.
7. Lock the glass into position with the screws provided and fasten the floor block.
8. Seal the bottom of the shower screen with silicone and leave for 24 hours to properly cure.

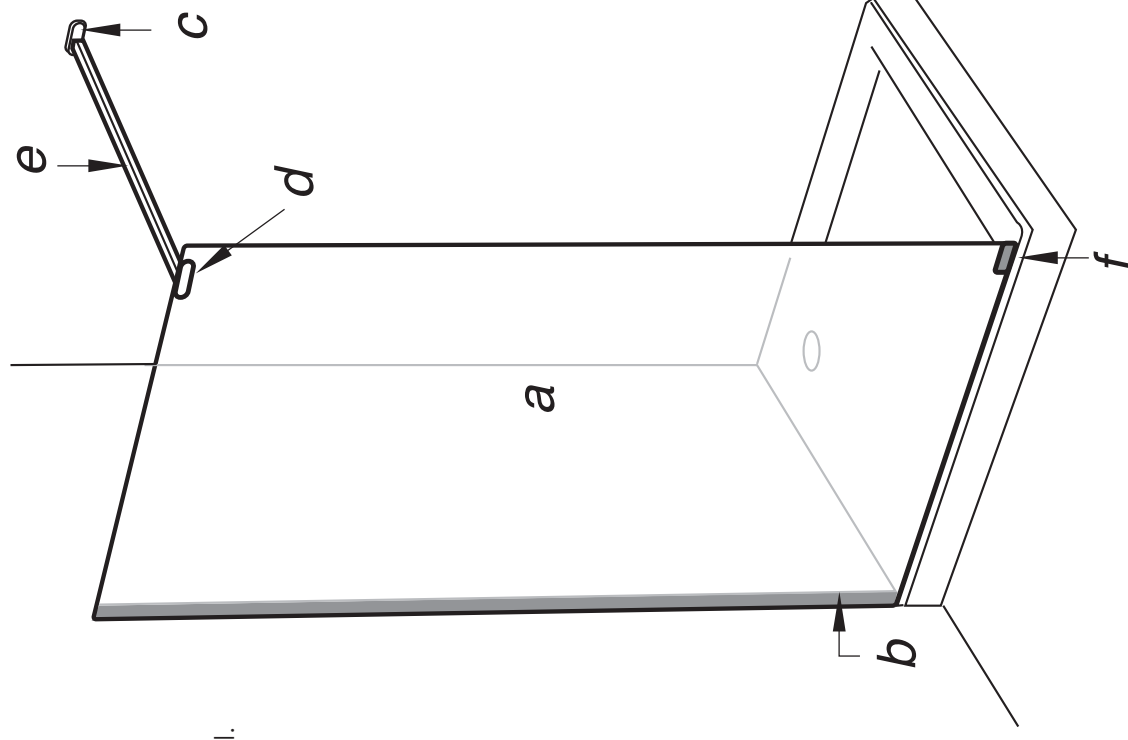

Special Note to Installer & End-User:

This product is made from the highest quality components and glass. The glass used is toughened safety glass according to SABS standards and complies with National Safety Standards and building regulations.

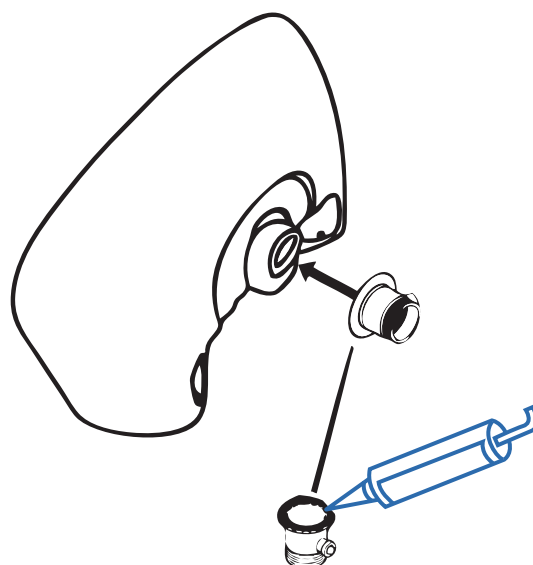

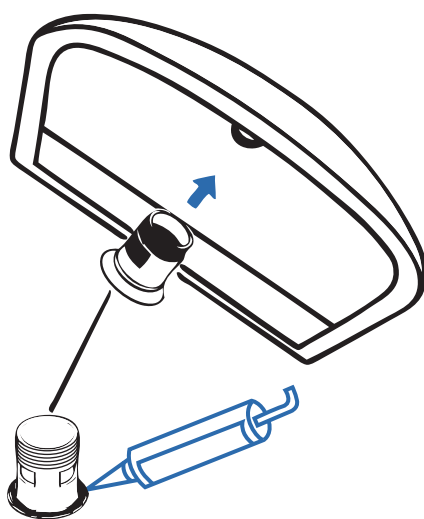

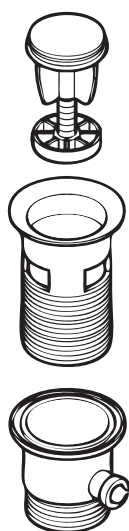

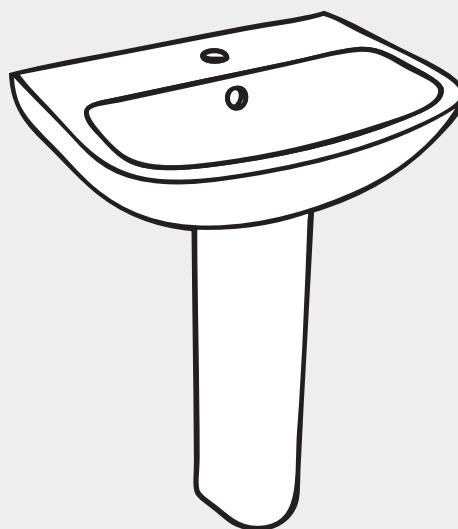

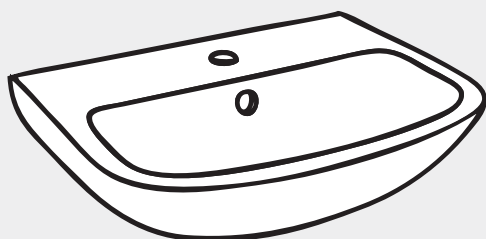

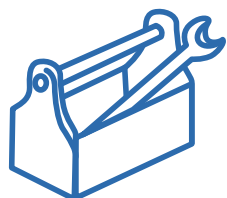

WARNING

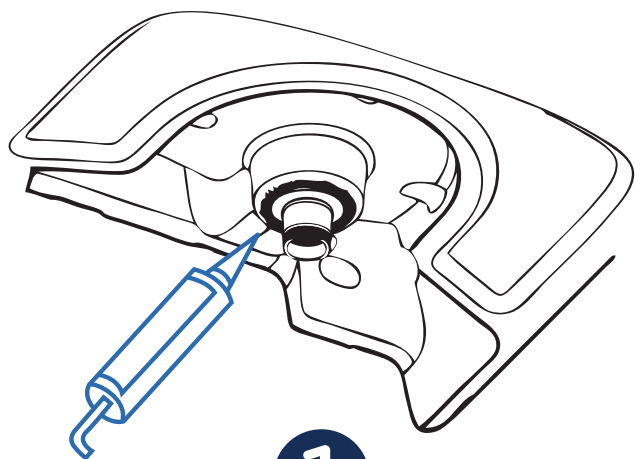

Toughened safety glass is designed to break safely in instances of accidental damaged. However, toughened safety glass remains a glass product, which, when shattered, can result in injury. Both Lecico and the manufacturer cannot accept any liability for accidental breakage – at any point in time – by any cause whatsoever.

TOP ENTRY URINAL INSTALLATION INSTRUCTIONS

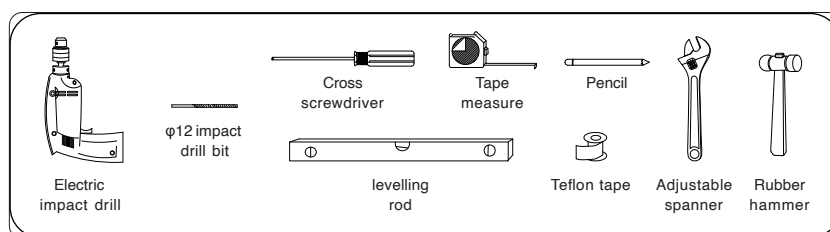

Simple, straightforward information, delivered straight to your inbox, for your convenience.

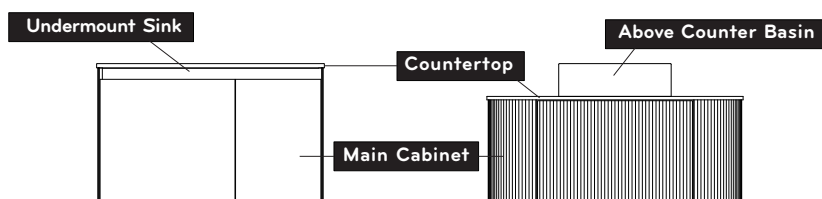

INSTALLATION MANUAL

1. INSTALLATION PREPARATION

- A** After unpacking, please read this manual carefully, check the components and parts, check whether there is any transportation damage. If there is any problem, please contact the local dealer or our company in time, you will get a satisfactory answer!
- B** Before drilling holes in the wall, it is necessary to verify whether there are hidden objects such as wires and water pipes in the wall to avoid accidental damage.
- C** Common installation tools: electric impact drill, $\phi 12$ impact drill bit, Cross hand drill, cross screwdriver, levelling rod, pencil, rubber hammer, tape measure, adjustable spanner, teflon tape.

2. PRODUCT OVERALL

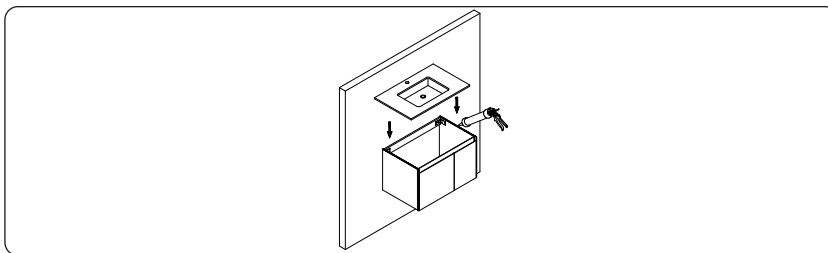

No.	Accessory Name	Picture
1	Plastic particle (M12)	
2	Stainless steel countersunk head tapping screws	
3	Foam pad	

4. INSTALLATION STEPS (COUNTERTOP)

COUNTERTOP INSTALLATION STEP:

To fix the countertop:

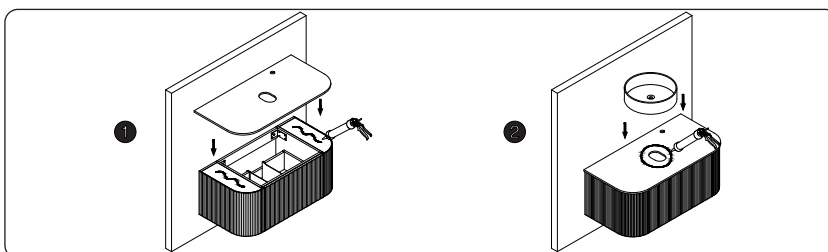

Put appropriate amount of glass glue around the top of the main cabinet. Then put the countertop into the main cabinet in a symmetrical way.

COUNTERTOP INSTALLATION STEP:

To fix the countertop:

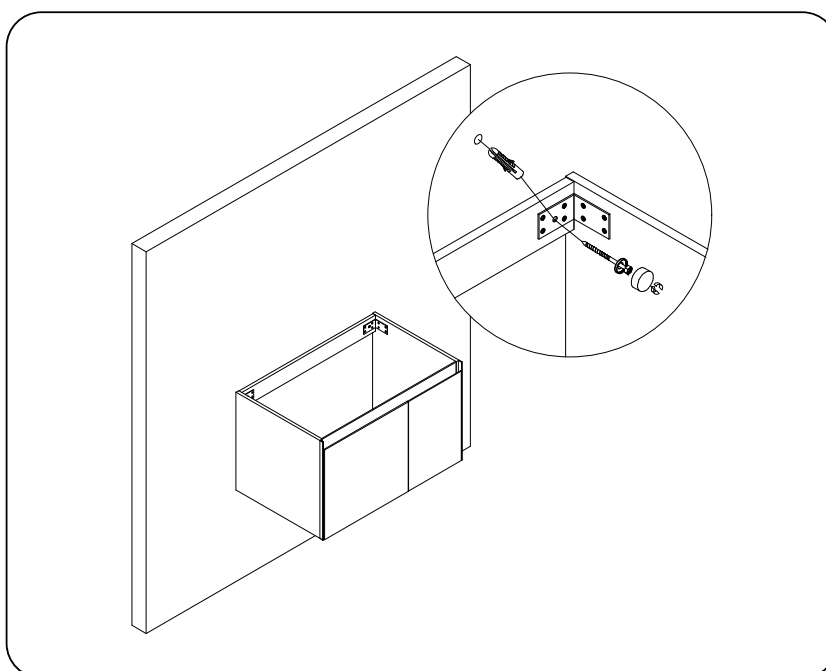

1. Put appropriate amount of glass glue around the top of the main cabinet. Then put the countertop into the main cabinet in a symmetrical way.
2. Put appropriate amount of glass glue on the top of the countertop. Then put the basin on the counter.

3. INSTALLATION STEPS (MAIN CABINET)

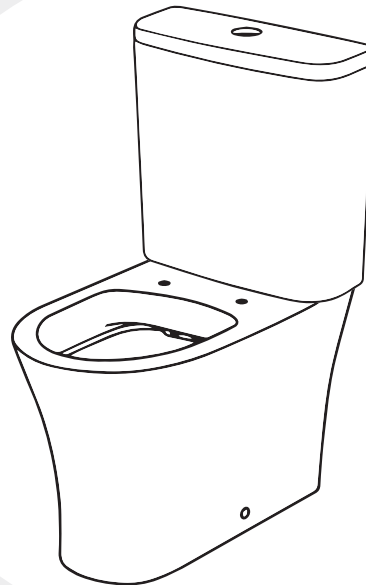

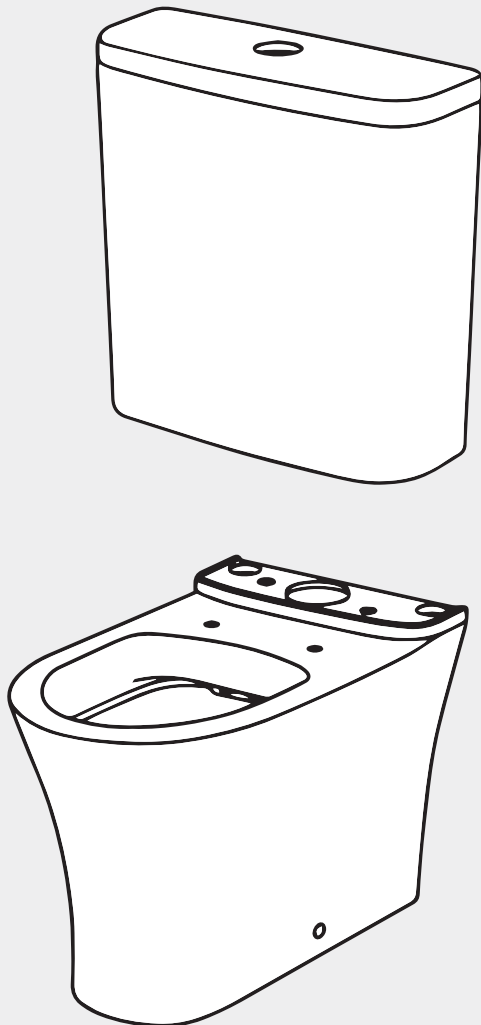

MAIN CABINET INSTALLATION STEP:

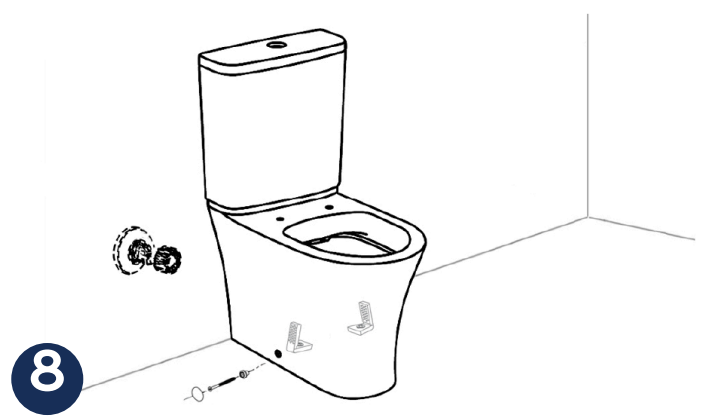

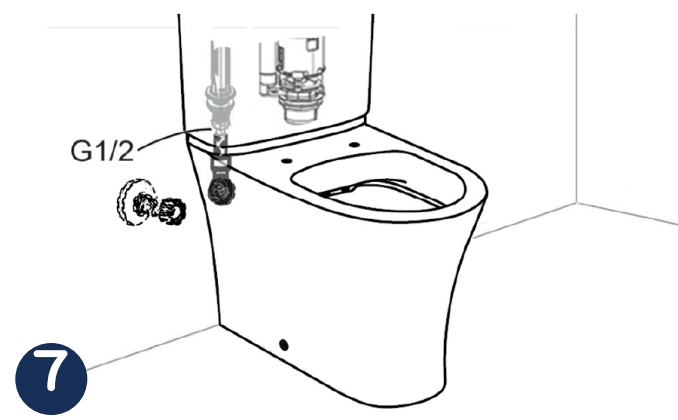

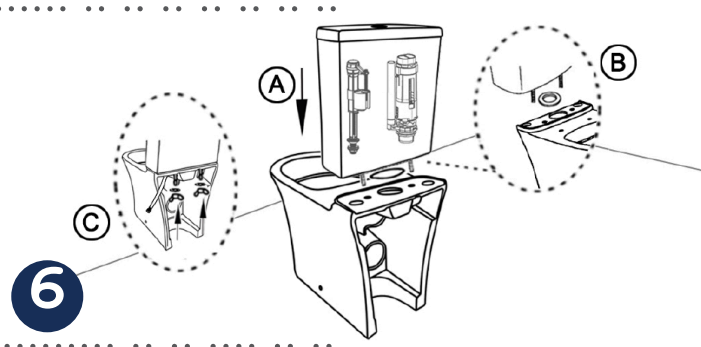

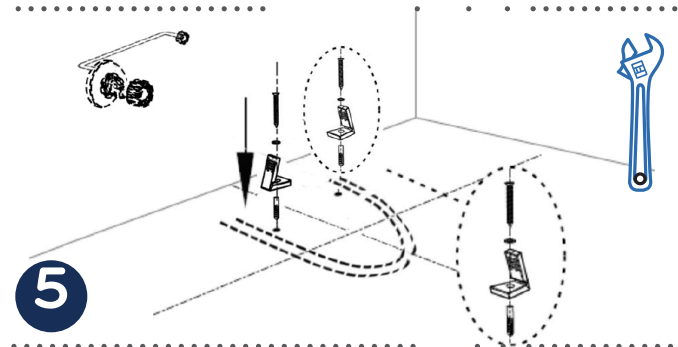

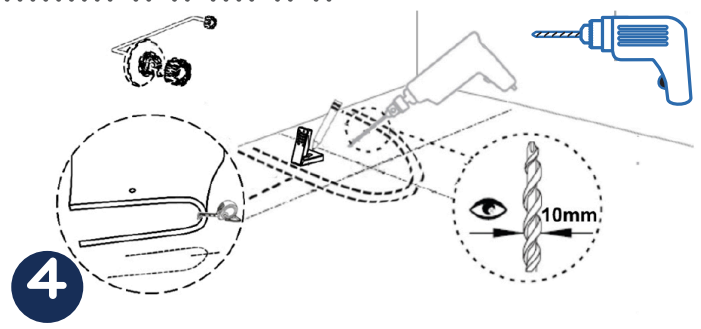

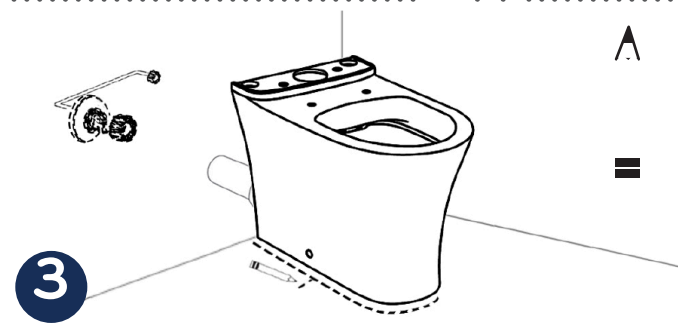

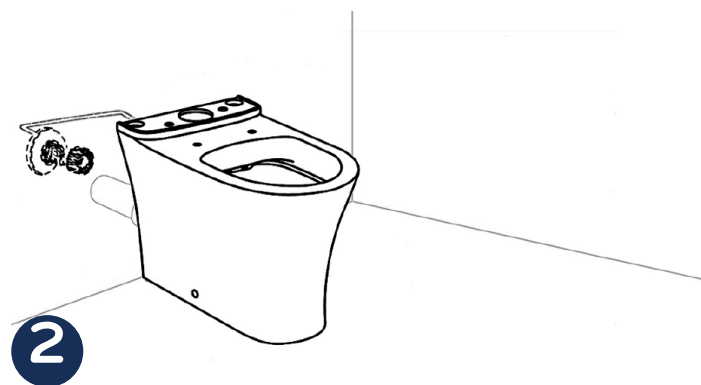

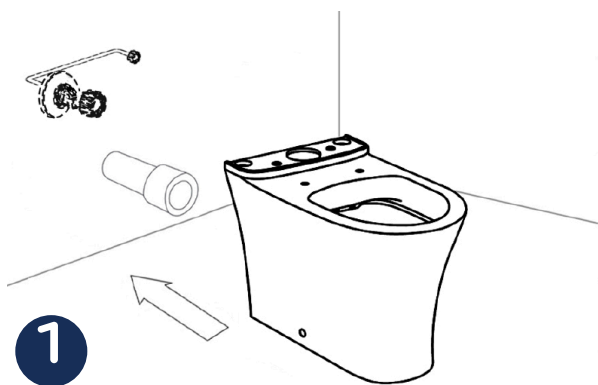

To fix the main cabinet against the wall: mark the wall hanging holes position on the wall, drill $\phi 12$ hole according to the number of holes in the back brace of main cabinet, put in the M12 plastic particles, and tighten the main cabinet on the wall with head tapping screws (8*85).

PAN
INSTALLATION GUIDE

1

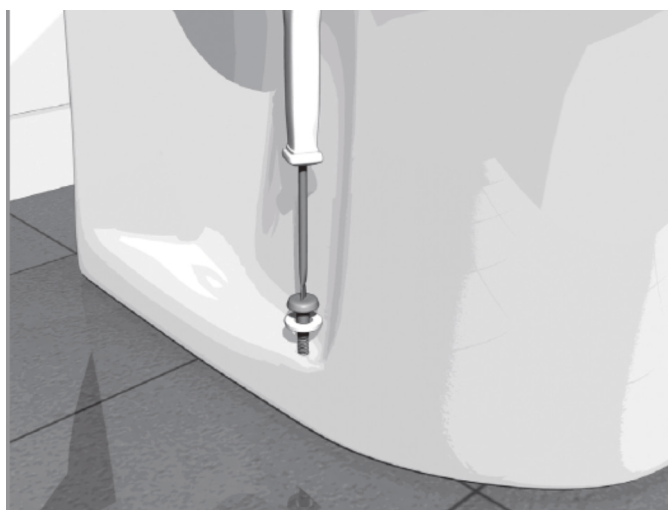

Mark the site of the fitting holes on the floor.

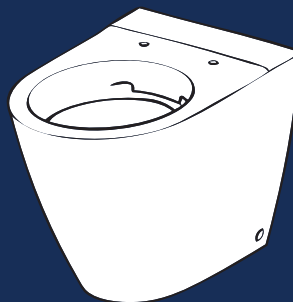

2

Drill holes and insert with the adapted peg.
Don't forget to tighten the waste, before the simultaneous tightening of the screws.

3

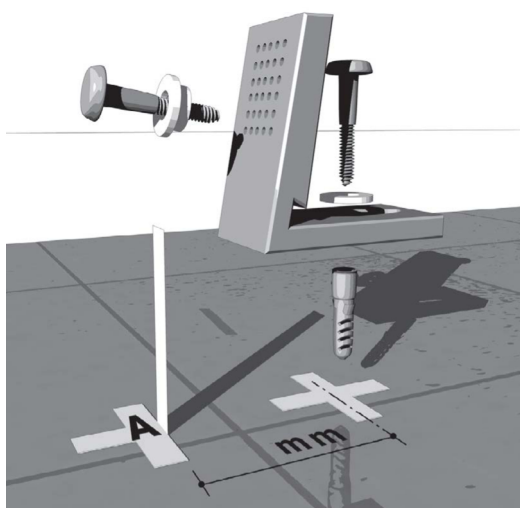

Put the caps on the screw heads.

4

Place the pan in its final position and make a reference mark on the floor.

5

The hole must be a specific distance from the reference mark A. Drill holes and insert the provided peg.

PARAPLEGIC GRAB RAIL

INSTALLATION GUIDE

Correct installation of the grab rail is required in order for it to withstand considerable force. The way in which a grab rail is fixed into the wall will determine the amount of force that can be applied through the rail.

CONSIDERATION MUST BE GIVEN TO:

1. The size and strength of the grab-rail so that it is appropriate for the person using it.
2. The amount of weight an individual will put through the grab-rail and their ability to grasp the rail safely.

MOUNTING INSTRUCTION

Different wall material e.g., brick, timber frame or plaster board will all require different methods of installation.

The manufacturer recommends that a builder be consulted for the installation of the grab-rails to ensure that the correct fittings are used for specific types of walls.

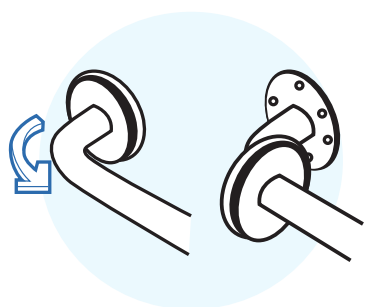

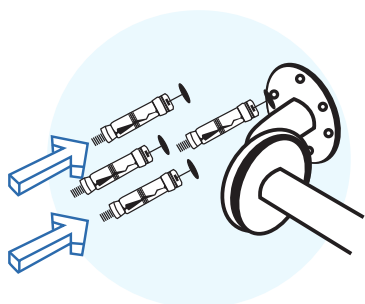

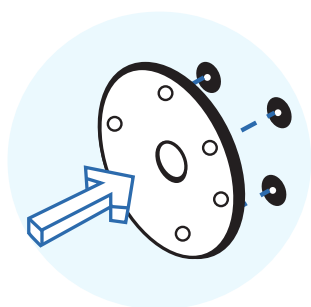

The manufacturer recommends that nothing shorter than a 6 x 55mm Expansion Bolt (rawl bolt) be used. (Rawl bolts sold separately)

SANS 10400-S:2011 prescribes that a minimum of 3 holes (out of the 6 provided) are used as a basic safety requirement.

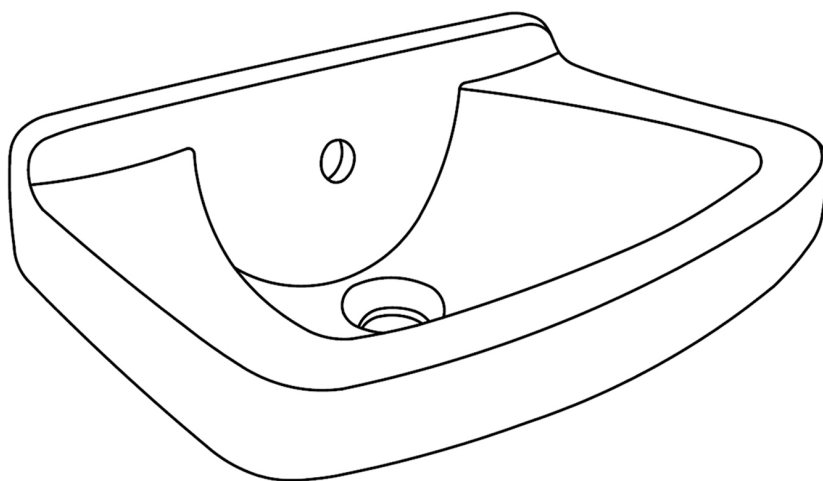

CLEARANCE FROM THE WALL

The distance from the wall to the grab-rail is important to consider as it needs to allow room for finger clearance and provide room for the hand to move along the top of the grab-rail without obstruction.

The manufacturer recommends that the distance between the grab-rail and wall should be 50 to 60 millimeters with a 600 millimeter unobstructed clearance above the rail, and a minimum of 50 millimeter unobstructed clearance below the rail except at fixing points.

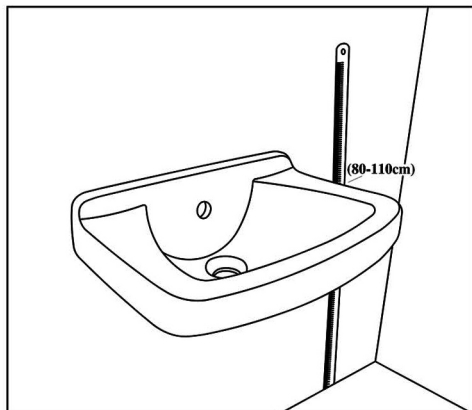

Installation Instructions & User Guide

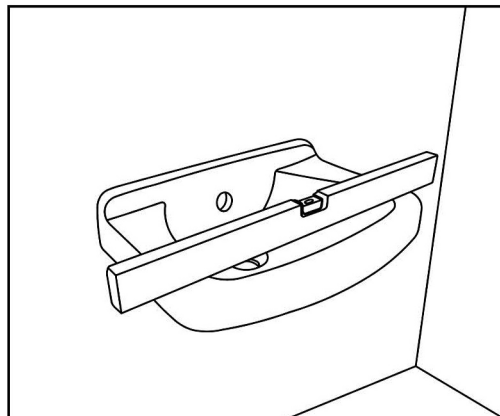

- Put the basin in the suitable height position.

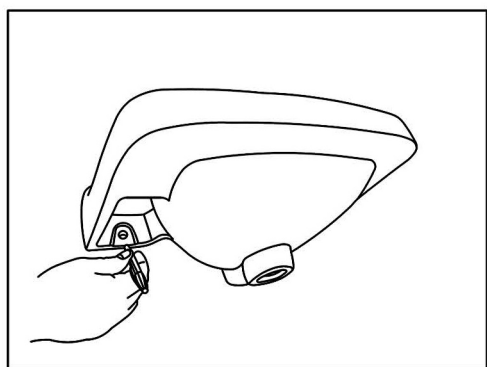

1

- Balance the basin.

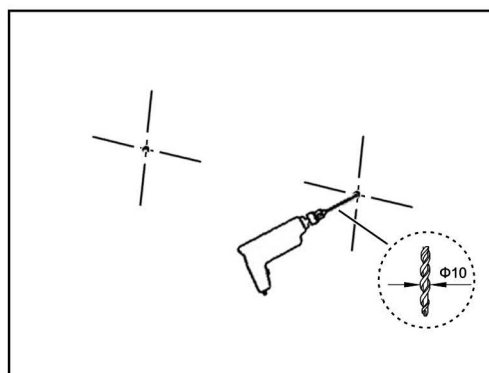

2

- Mark the wall on both sides

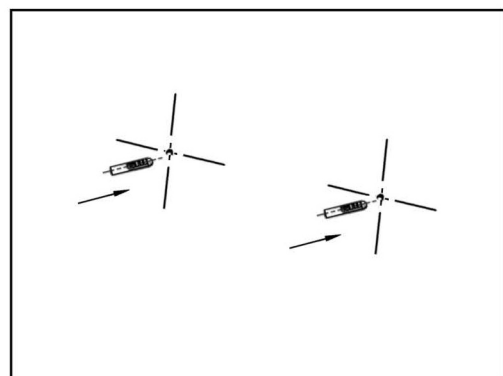

3

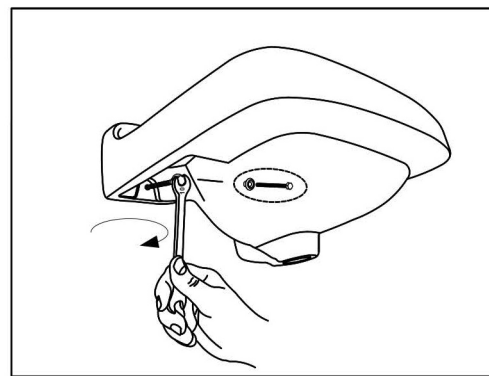

- Drill each fixing hole.

4

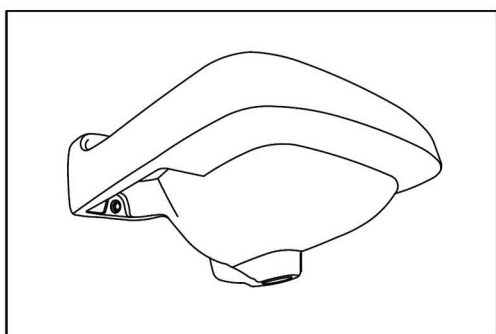

4

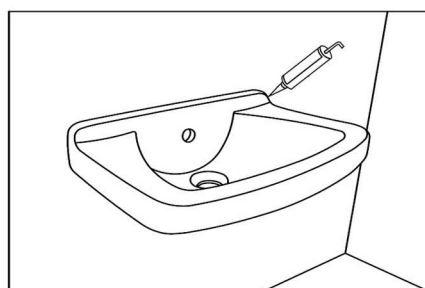

5

- Use a suitable silicon sealant around the back of the basin to keep watertight.

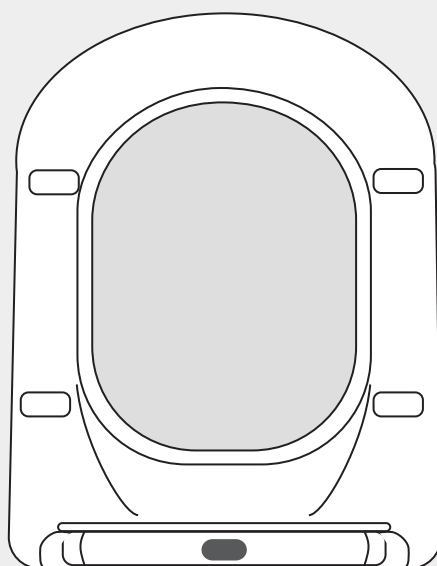

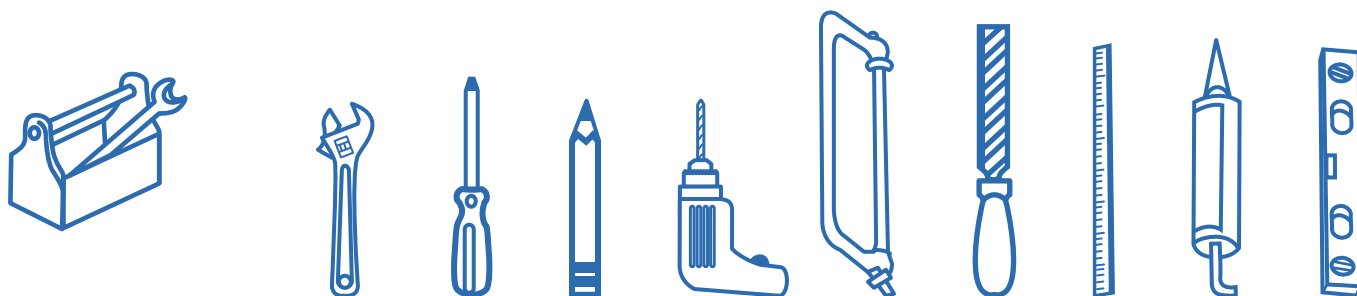

6

7

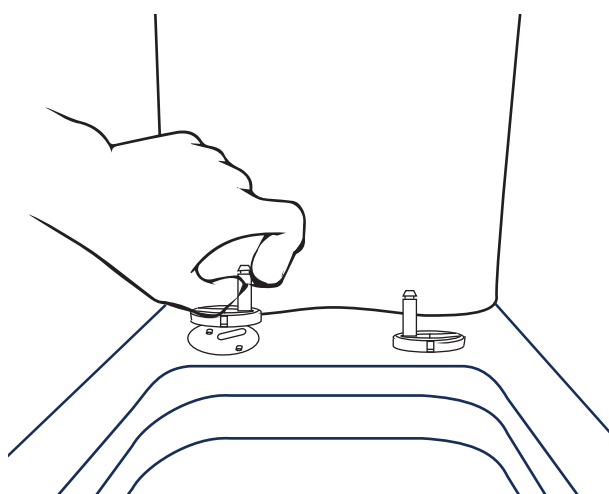

SOFT CLOSE SEAT

INSTALLATION GUIDE

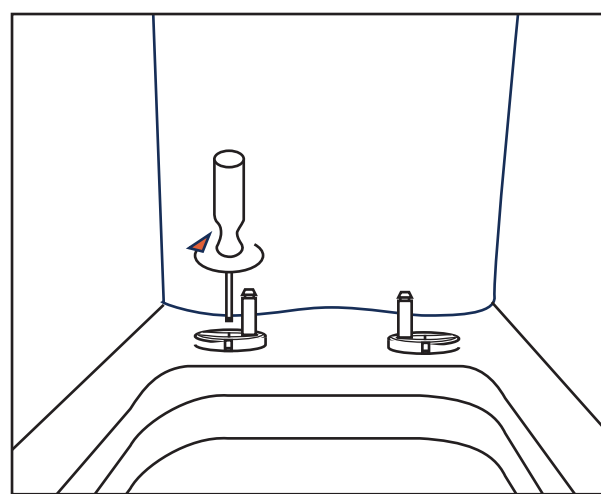

1

2

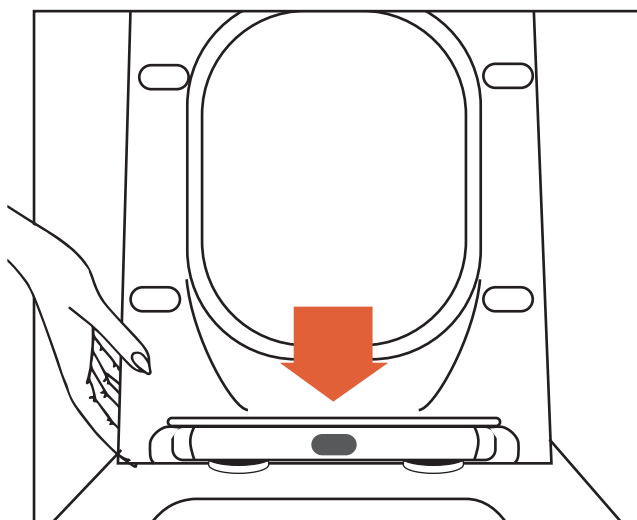

1. Insert the screw on the hinge base into the holes on the pan.

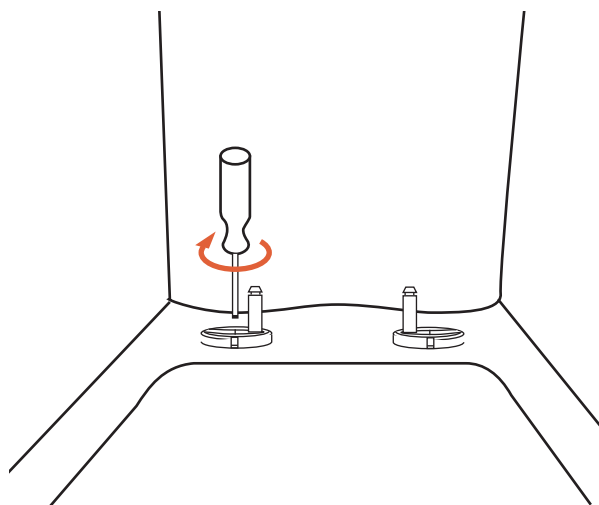

2. Tighten the setscrew but not to the end in order to adjust the seat cover properly.

3

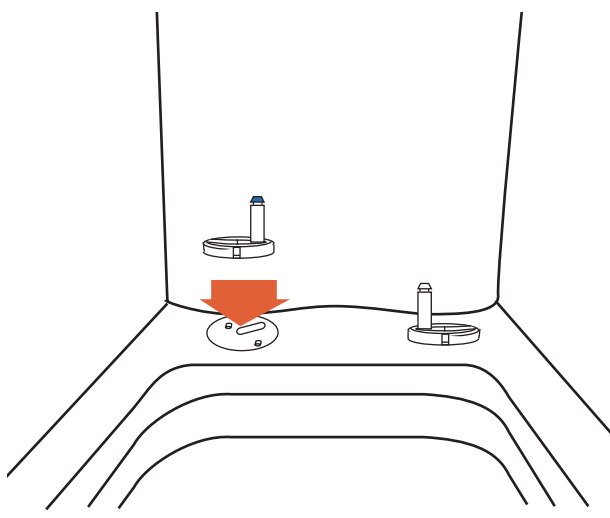

- 3. Aim at the holes and adjust the hinge base to make the seat cover and pan match.**

4

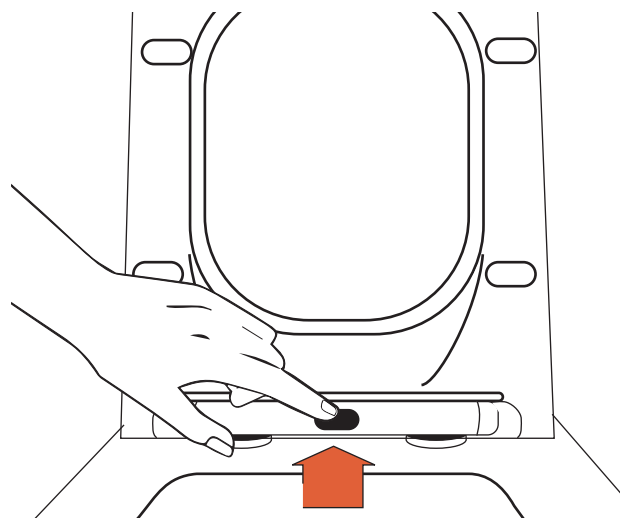

- 4 Lock the support completely on the ceramics and cover with stainless steel cover.**

5

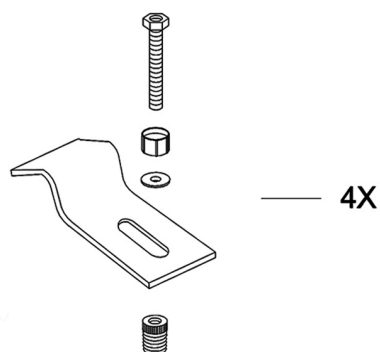

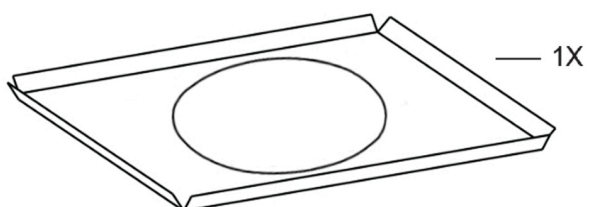

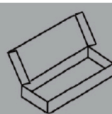

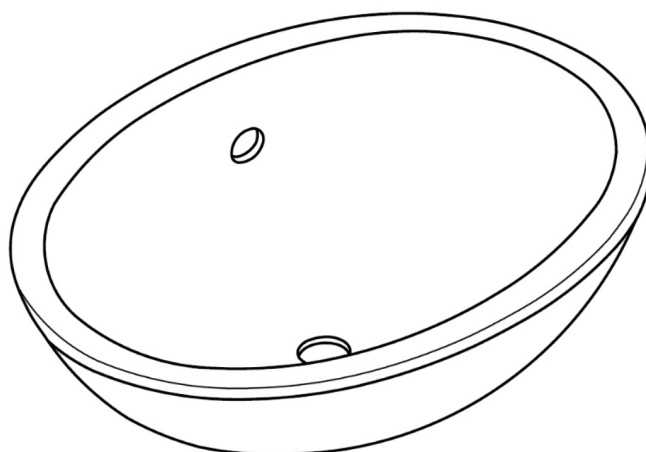

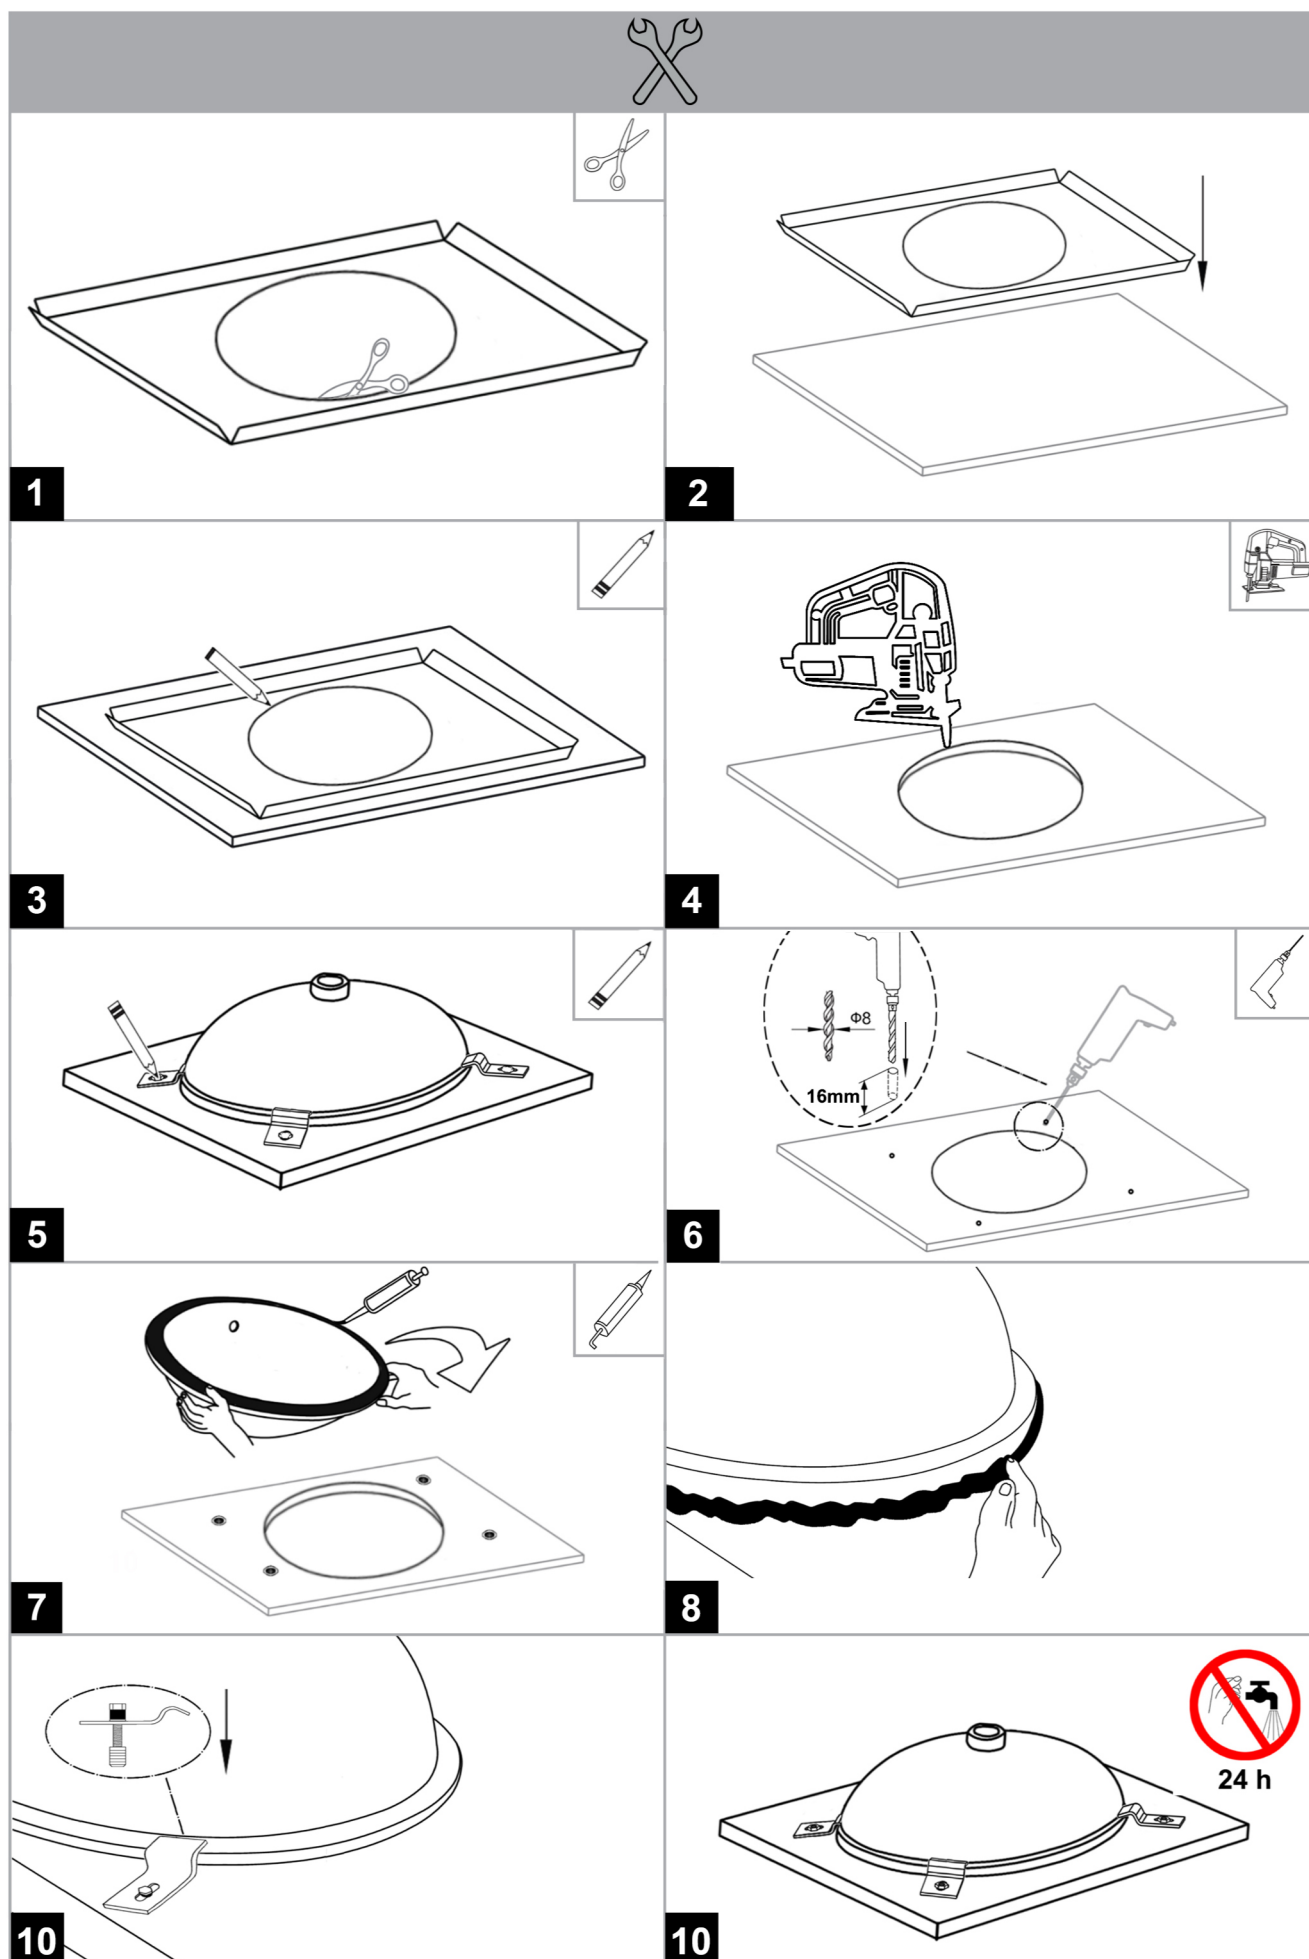

- 5. Put the cap into the hinge base. Fix the seat cover into the hinge base. Finish.**

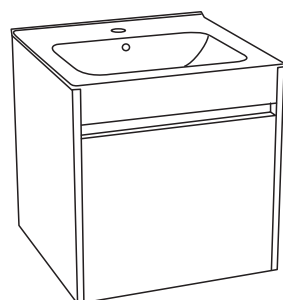

6

- 6. Press the button down and pull up to easily remove the cover plate for convenience. Clean.**

INCLUDED

Drill

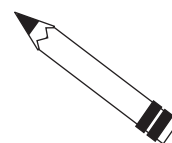

Silicone

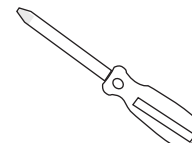

Tape Measure

8mm Drill Bit

Marker

Screwdriver

REQUIRED TOOLS NOT INCLUDED**THINGS TO NOTE:**

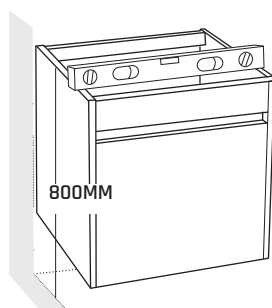

- INSPECT UNIT AND COMPONENTS BEFORE INSTALLATION

- RECOMMENDED HEIGHT TO TOP OF Cabinet, EXCLUDING THE BASIN IS 800MM
- ENSURE NOT TO

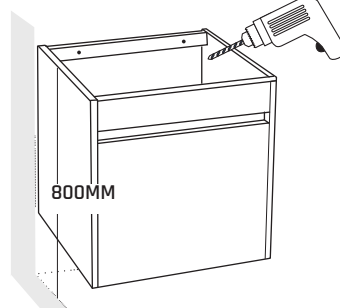

DRILL HOLES INTO CONCEALED PLUMBING IN THE WALL

- CHECK THAT TRAPS

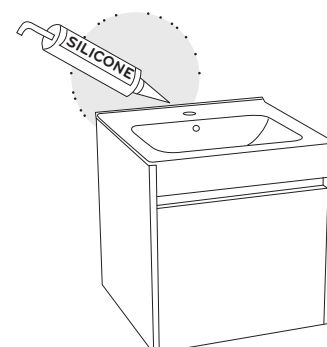

AND WATER CONNECTIONS ARE UNOBSTRUCTED

1

- Ensure unit is level and will fit desired area
- Mark drilling points on the wall
- Drill marked points using a 8mm drill bit

2

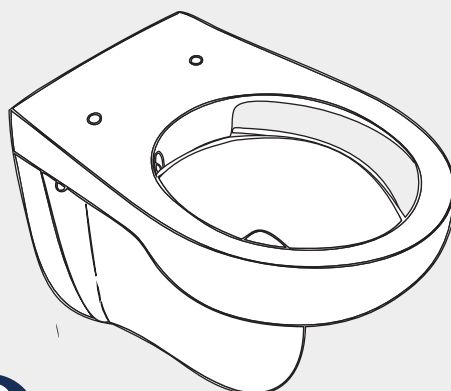

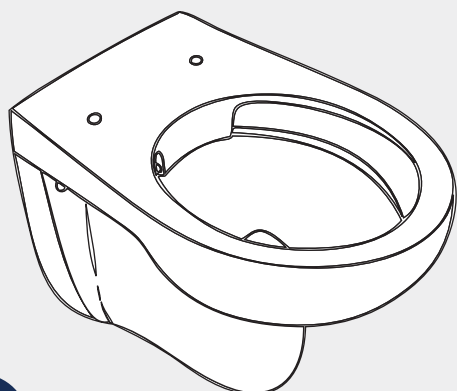

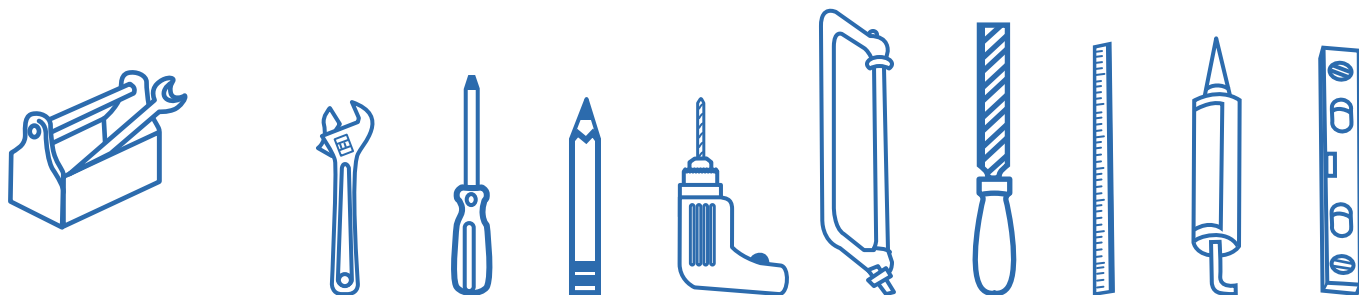

- Screws and wall plugs supplied should be fitted through the pre-drilled holes in cabinet back support
- Fasten cabinet to wall with provided screws
- Fit the basin mixer and waste onto the basin

3

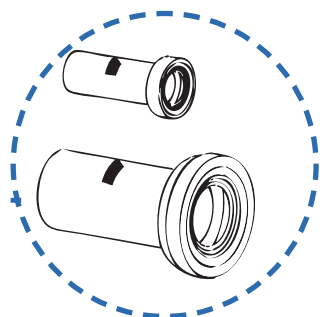

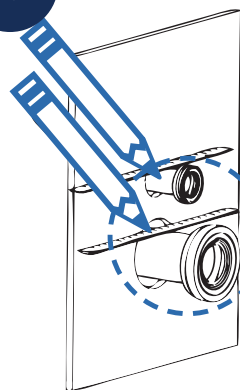

- Fit outlet trap to outlet point
- Place basin on cabinet and silicone together
- Connect trap and mixer and check for any leaks
- Use silicone to seal any gaps between basin and wall
- Allow 24 hours to dry before use

2、Installation of protective case:

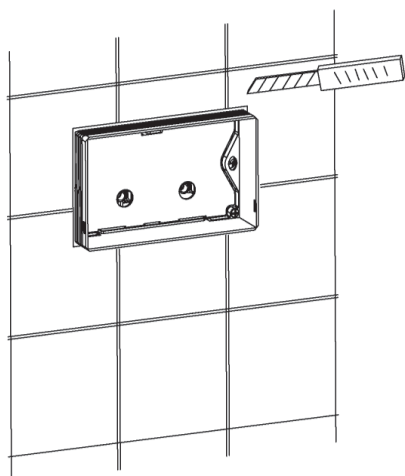

3、Installation of bend plug:

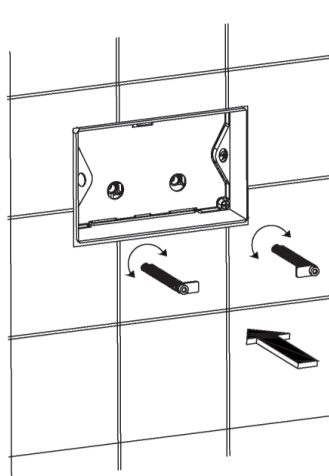

4、Build the partition wall:

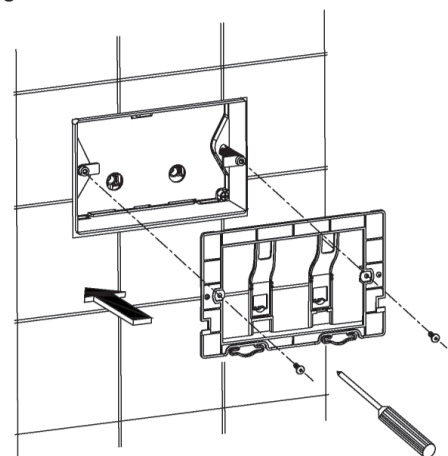

5、Installation of cotrol plate base and connective levers for control plate button:

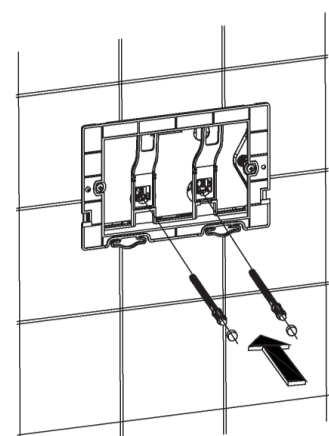

(1) Flattting the protective case frame against the wall surface

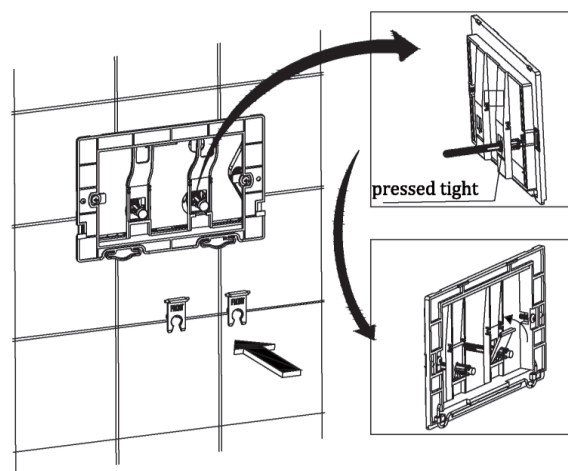

(2) Screw in the levers for control plate

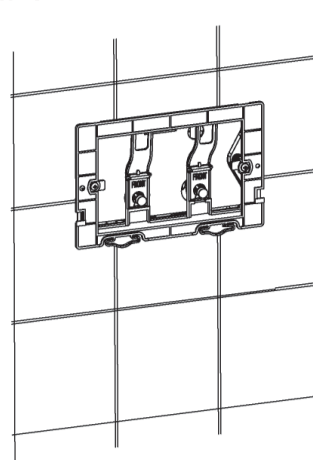

(3) Fix the control plate base

(4) Screw in the connetetive levers for buttons

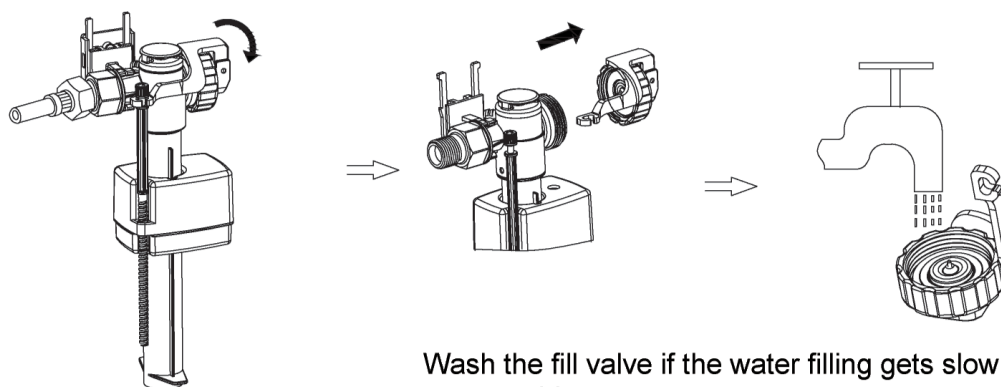

(5) Install the blocks as sunggested

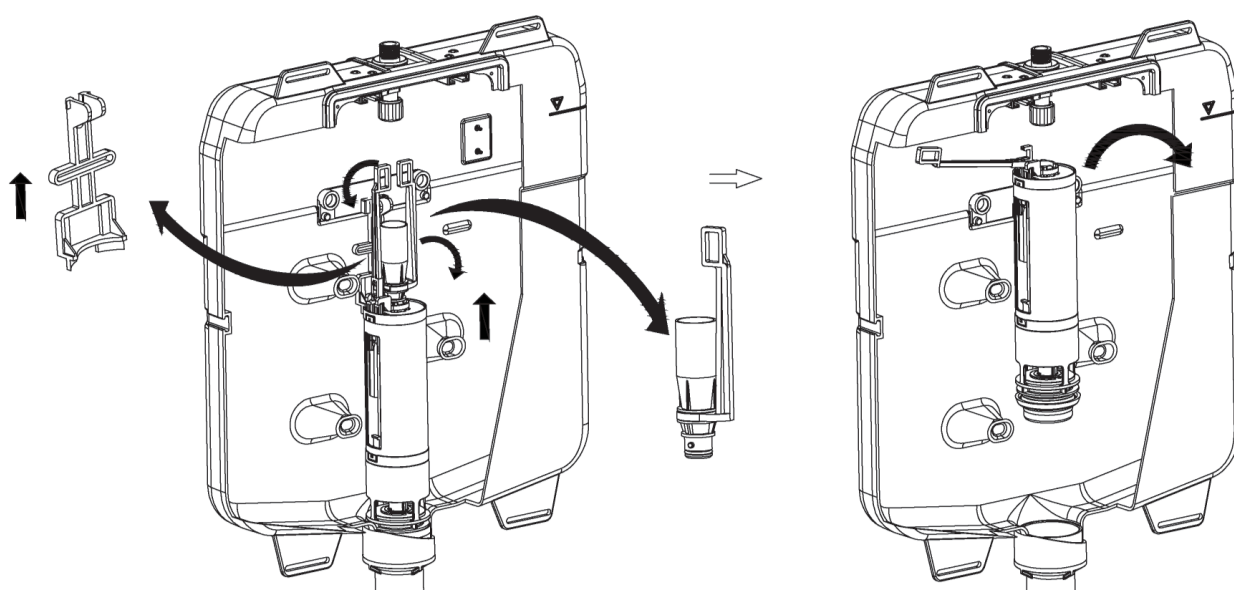

(6) Make sure the connective levers of button work well

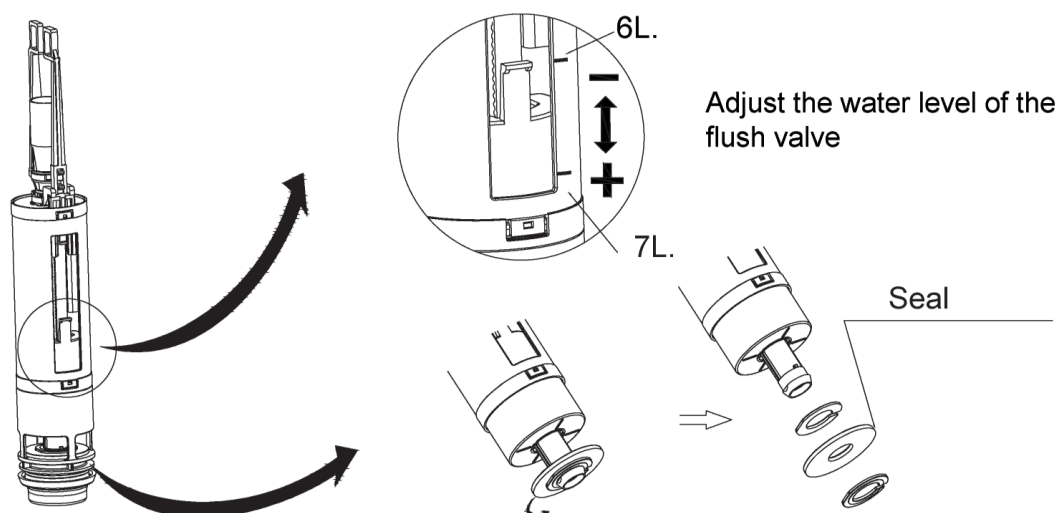

9. Maintenance of the cistern fittings:

Wash the fill valve if the water filling gets slow or unstoppable

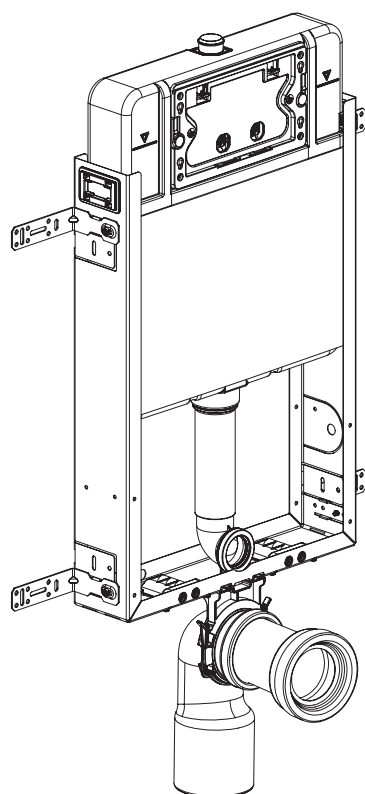

Installation & remove the flush valve

Adjust the water level of the flush valve

Maintenance of the seal

CONCEALED CISTERN USER GUIDE

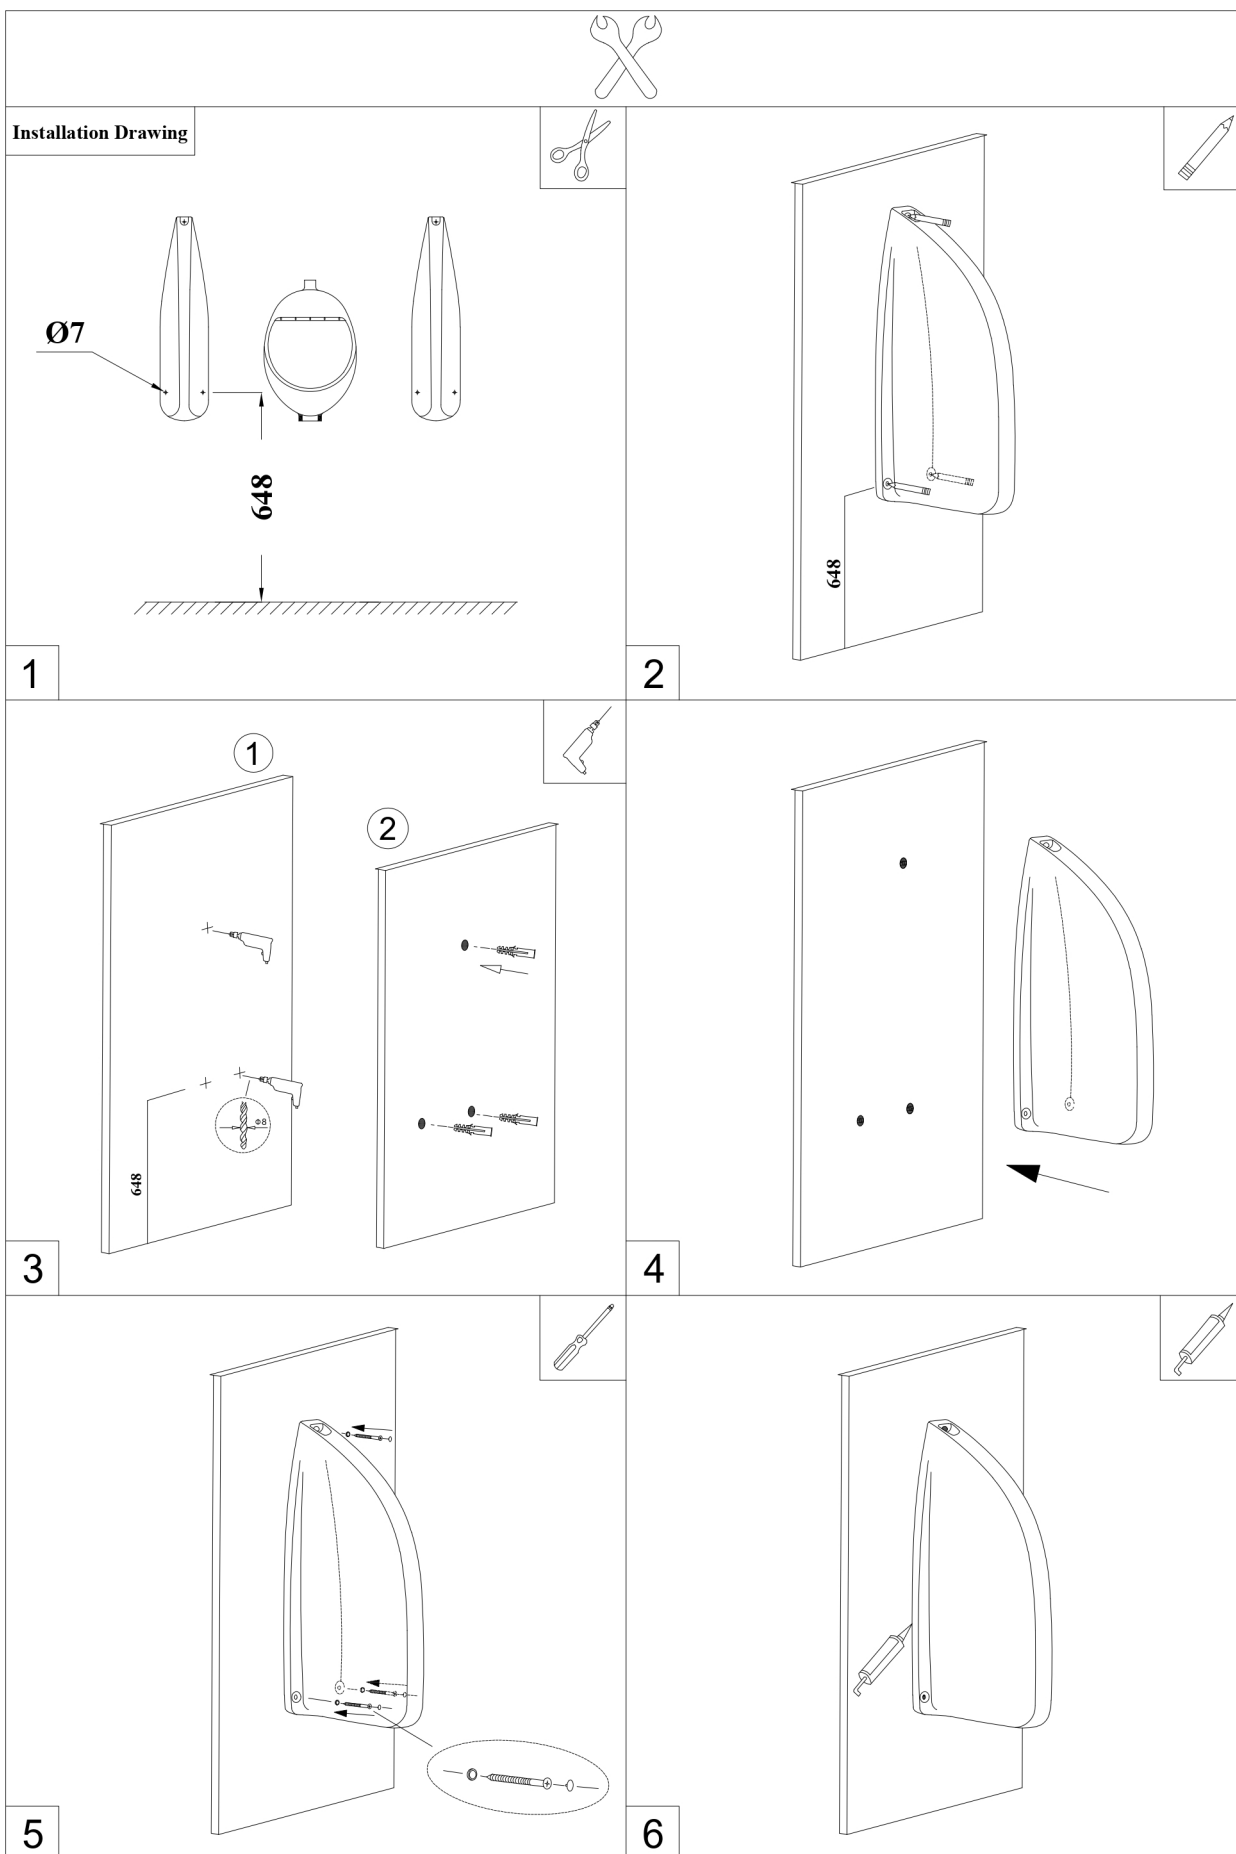

Parts List Tips: \ ~ Please install this product before paving tiles. Before installing, confirm the installation location and confirm the horizon after the completion of the project. Draw the horizon ↓ on the installation wall. This product is installed as a baseline ↓ for the installation height.	Product specifications Note: Slim type can be installed in the 103mm thick wall.
Installation Steps	
1.False wall (half false wall) false wall half false wall	2.Assemble wall brackets to the metal frame
3.Install the cistern	

NOTE: the size unit is mm, ↓ = the floor height after the project. The fill water pressure and stop filling pressure is between 0.01MPa-2.0MPa, water temperature: 2°C-45°C, flush volume can be adjustable.

SERVICE CALLS

All Lecico ceramic products have a 20-Year Limited Warranty

All WC mechanisms have a 1-Year Limited Warranty

All seats have a 2-Year Limited Warranty

All shower screens have a 1-Year Limited Warranty

All baths have a 10-Year Limited Warranty

All cabinets have a 1-Year Limited Warranty

All Mechanical Flush / Access Plates have a 2-Year Limited Warranty

All concealed cisterns have a 5-Year Limited Warranty

175

This warranty covers failures arising from manufacturing defects.

SUBMITTING A SERVICE CALL REQUEST

Email your Lecico Representative or alternatively; anne@lecicosa.co.za

Attach supporting Documents & Details

1. Lecico Invoice Number
2. Product name & description
3. Copy of Customer purchase document
4. Customer Contact details and Address
5. A video / image and explanation of fault or defect

Lecico works on a 24 Hour turn around time for a Lecico Representative to make contact with customers on service calls.

VALID CLAIMS

Lecico will either replace, repair or refund manufacturer defective products.
